PROFESSIONAL SUMMARY

Applied AI Solutions Engineer who designs and ships production software end to end — TypeScript/React web applications, retrieval-grounded AI assistants, and agentic engineering workflows with independent review loops. Owner of a company website rebuild and an ERP/CRM used daily by 10 staff. Two products live in production.

CORE SKILLS

AI & Agentic Engineering: OpenCode, Claude, DeepSeek, Gemini, multi-model task routing, agentic review loops, prompt engineering
Full-Stack Engineering: TypeScript, Next.js 16, React 19, TanStack Start, Tailwind CSS, JavaScript, Python, REST APIs, Zod, React Hook Form
Data & Platforms: Supabase, PostgreSQL (RLS), SQLite, SQL (T-SQL), Power BI, Pandas/NumPy, IndexedDB
RAG & Assistants: Retrieval grounding, KB indexing, LLM routing (Gemini 2.0 Flash, GPT-4o-mini), rule-engine fallback, lead capture
Delivery & Deployment: Vercel, Netlify, DNS & domains, SSL/TLS, CI pipelines, Git/GitHub, Vitest, offline-first architecture, SEO/GEO
Forward Deployment: On-site discovery, solution design under constraints, stakeholder communication, rollout and adoption, operator support

PROFESSIONAL EXPERIENCE

Applied AI Solutions Engineer — Prokon Hi-Tech Systems

Faridabad, India · 2025 — Present

- Own the company web platform and internal ERP/CRM end to end — architecture, Postgres schema and row-level security, UI, deployment — for a system 10 staff run daily.
- Shipping a Next.js 16 + TypeScript website rebuild: 96-model catalogue, retrieval-grounded assistant (Gemini 2.0 Flash / GPT-4o-mini) that answers from the knowledge base and captures leads; in development with hosting in progress.
- Run an agentic build pipeline — multi-model generation with an independent review agent on a different model family auditing every diff before merge.
- Replaced spreadsheet-run operations with priority-based ticket triage (P1–P5), live dashboards and real-time reporting — record errors down, urgent jobs first.

Data & Business Analyst Intern — Trossachs Corporate Advisors

Faridabad, India · Jan 2026 – May 2026

- Delivered DataFlow Pro, a BI platform unifying revenue, compliance risk and operational KPIs into one real-time dashboard (Power BI, SQL, Python).
- Saved leadership 15–20 hours/month of manual data processing and reporting.
- Accelerated delivery with AI-assisted SQL refactoring (Claude) and pipeline orchestration (OpenCode).

Software Developer Intern — Prokon Hi-Tech Systems

Faridabad, India · Jun 2024 – Jul 2024

- Digitised inventory-tracking and AMC-management workflows into a Python/MySQL system with HTML forms and Google Suite, replacing paper processes.
- Cut administrative turnaround time and improved reporting accuracy for the operations team.

PROJECTS

Prokon Hi-Tech Website (2026)

Next.js 16 · TypeScript · In development, hosting in progress

- 24 routes, 96-model catalogue (faceted search, compare, 60+ spec rows), RAG assistant, sizing tools; SEO/GEO-ready (sitemap, JSON-LD, llms.txt).

Prokon ERP / CRM (2026)

TanStack Start · Supabase · In daily use by 10 staff

- 8 modules (CRM, sales, inventory, purchase, service, finance, HR, admin); 145 routes, 113 migrations, 75 tests. P1–P5 triage with P1-first queues; field portal (serial photo + GPS, FSR); live ticket/AMC dashboards.

SJS Retail Jewellery Suite (2026) — React · Supabase · Live: retailjewellery.netlify.app — Offline-first retail suite: billing, HUID tracking, PDF invoices; 20+ Vitest tests; used daily with no internet required.

Employee Attendance System (2026) — React · IndexedDB · Live: employeeattendance.netlify.app — Camera QR/barcode check-in (~1s scans), 3 role tiers, queued offline sync, Excel export; zero records lost offline.

EDUCATION

Bachelor of Computer Applications — AI — Lingaya's Vidyapeeth, Faridabad · 2023 – 2026 · CGPA 9.0
Senior Secondary — Commerce — Grand Columbus International School, Faridabad · 2021 – 2023 · 93%

CERTIFICATIONS

- 2026:** Business Analysis Foundations: Strategy Analysis (LinkedIn Learning · IIBA-endorsed), Business Analysis: Essential Tools & Techniques (LinkedIn Learning)
- 2025:** SQL Server 2022 Administration (LinkedIn Learning · Microsoft Press), Advance Your MS SQL Server Skills (LinkedIn Learning), Introduction to Transact-SQL (LinkedIn Learning), Power BI for Data Analysis (Vodafone Idea Foundation), Build Reports & Dashboards in Power BI (Vodafone Idea Foundation), SOAR — AI to be Aware (NSQF Level 2) (NASSCOM / NCVET), MongoDB Basics for Students (MongoDB · Credly)
- 2024:** Introduction to Business Intelligence (Infosys Springboard), Operating System Fundamentals (NPTEL · IIT Kharagpur), Data Science Completion Course (Data Science Program), NumPy, SciPy, Matplotlib & Pandas A–Z: ML (Udemy)
- 2023:** Introduction to Microsoft Excel (Coursera)
