

SUMMARY

Applied AI Solutions Engineer who designs and ships production software end-to-end — React/Supabase web applications, SQL/Power BI analytics pipelines, and AI-assisted engineering workflows (OpenCode, Claude, DeepSeek, Gemini). Two products I built are live in production today, and a BI platform I delivered saved 15–20 hours of manual reporting per month. Currently building AI-powered solutions at Prokon Hi-Tech Systems.

CORE SKILLS

AI & Agentic Eng.	OpenCode · Claude · DeepSeek · Gemini · Multi-Model Task Routing · Agentic Review Loops · AI-Assisted Code Generation & SQL Refactoring · Prompt Engineering	Software Eng.	React · JavaScript · Python · REST APIs · Offline-First Architecture · Automated Testing (Vitest) · HTML/CSS
Data & BI	SQL (T-SQL) · MySQL · Power BI · Pandas/NumPy · Dashboarding · Database Design · Predictive Modeling	Deployment & Tools	Git/GitHub · Netlify · Vercel · Vite · Supabase · IndexedDB · Barcode Vision (polyfill)

EXPERIENCE

- Applied AI Solutions Engineer · Prokon Hi-Tech Systems

Present

 - Deliver production applications end-to-end — database design, architecture, UI, deployment — using agentic workflows and multi-model orchestration (OpenCode, Claude, DeepSeek, Gemini).
 - Shipping the new company website from architecture to production with a multi-agent review pipeline on every commit.
 - Route development phases to specialised models — generation, review, reasoning — so independent review agents catch defects before deployment.
- Data & Business Analyst Intern · Trossachs Corporate Advisors

Jan 2026 – May 2026

 - Delivered DataFlow Pro, a BI platform unifying revenue trends, compliance risk and operational KPIs into one real-time dashboard (Power BI, SQL, Python).
 - Saved leadership 15–20 hours/month of manual data processing and reporting.
 - Accelerated delivery with AI-assisted SQL refactoring and pipeline orchestration (Claude, OpenCode).
- Software Developer Intern · Prokon Hi-Tech Systems

Jun 2024 – Jul 2024

 - Digitised manual inventory-tracking and AMC-management workflows into a Python/MySQL system with HTML forms and Google Suite, replacing paper processes.
 - Cut administrative turnaround time and improved reporting accuracy for the operations team.

PROJECTS

- SJS Retail Jewellery Suite

LIVE ON NETLIFY

 - Offline-first retail management system (React, Supabase, IndexedDB) for a jewellery business with unreliable internet — billing, stock, purchases, customers and PDF invoices, used daily in production.
 - Built a live gold-rate calculator and hallmark HUID splitting engine for GST-compliant tracking; role-based auth with audit trails.
 - Protected money-moving logic with 20+ automated unit tests (Vitest) covering billing, stock and CSV imports; an independent AI review agent patches defects before deploy.

Stack: React · Vite · Supabase · IndexedDB · Vitest · OpenCode/Claude review loop — retailjewellery.netlify.app
- Employee Attendance System

LIVE ON NETLIFY

 - Camera-based QR/barcode gate check-in (1-second scans) built with a barcode-detector polyfill — no native SDK required.
 - Offline-first with queued local sync; three role tiers (employee/admin/super admin); reports with Excel export.
 - Shipped from concept to deployed app in under 48 hours with AI-assisted code generation (OpenCode, DeepSeek).

Stack: React · Vite · IndexedDB · Barcode Vision · OpenCode/DeepSeek — employeeattendance.netlify.app
- DataFlow Pro — BI Platform

SHIPPED AT TROSSACHS

 - Real-time analytics across revenue, compliance risk and operational KPIs in one dashboard leadership opens daily — replacing scattered Excel exports and manual aggregation.
 - AI-orchestrated SQL pipelines — Claude for SQL refactoring, OpenCode for pipeline orchestration.

Stack: Power BI · SQL · Python — github.com/Madav-Verma/DataFlow-Pro

EDUCATION

- Bachelor of Computer Applications — AI

Lingaya's Vidyapeeth, Faridabad · 2023 – 2026

CGPA 9.0
- Senior Secondary — Commerce

Grand Columbus International School, Faridabad · 2021 – 2023

93%

CERTIFICATIONS

- 2026 Business Analysis Foundations: Strategy Analysis — LinkedIn Learning / IIBA

2025 SQL Server 2022 Administration — LinkedIn Learning / Microsoft Press
- 2025 Power BI for Data Analysis · Build Reports & Dashboards in Power BI — Vodafone Idea Foundation

2025 SOAR — AI to be Aware (NSQF Level 2) — NASSCOM / NCVET
- 2025 MongoDB Basics for Students — MongoDB / Credly
- Additional certifications (10+): Transact-SQL, MS SQL Server, Business Intelligence, Python data stack, Excel — available on request.
