

PROFESSIONAL SUMMARY

AI-Native Product Builder who designs and ships production-grade software at 10x speed using **autonomous agent loops, multi-model orchestration** (Claude, DeepSeek, Gemini), and a full-stack mindset. Routes tasks across models for different development phases — code generation, review, and reasoning. Built with **OpenCode** terminal-based agents and independent review sub-agents on every build. Two products live in production; a BI platform saved leadership 15–20 hours of manual processing per month.

CORE SKILLS

Agentic Orchestration	OpenCode · Claude · DeepSeek · Gemini · Multi-Model Routing · Agent Workflows · Automated Code Review · Sub-Agent Loops	Engineering	React · Vite · JavaScript · Python · MySQL · Supabase · REST APIs · Git & GitHub · Vercel · Netlify · Offline-First
Data & BI	SQL (T-SQL) · Power BI · Pandas & NumPy · Predictive Modeling · Dashboarding · Database Design	Delivery	Rapid Prototyping · End-to-End Delivery · Requirements Gathering · Workflow Digitization · Process Automation

EXPERIENCE

- AI-Native Solutions Engineer · Prokon Hi-Tech Systems

Present

Building end-to-end AI-powered solutions using agentic workflows — multi-model orchestration, autonomous review loops, and rapid prototyping

Shipping a new company website with full agentic pipeline — from architecture to production (live soon)

Orchestrating OpenCode, Claude, DeepSeek, and Gemini for different development phases — the right model for the right task

OpenCode

Agentic Orchestration

Multi-Model

End-to-End Delivery
- Data & Business Analyst Intern · Trossachs Corporate Advisors

Jan 2026 – May 2026

Delivered DataFlow Pro — a BI & analytics platform with real-time visibility into revenue trends, compliance risk and operational KPIs

Saved leadership 15–20 hours/month of manual data processing and reporting

Used AI-assisted tools (Claude, OpenCode) to accelerate delivery and SQL refactoring

Power BI

SQL

Python

AI-Assisted
- Software Developer Intern · Prokon Hi-Tech Systems

Jun 2024 – Jul 2024

Digitised manual business workflows — inventory tracking and AMC management — into a Python/MySQL system

Replaced paper-based processes with HTML forms and Google Suite, cutting administrative turnaround time

Python

MySQL

HTML

Automation

PROJECTS

- SJS Retail Jewellery Suite

LIVE ON NETLIFY

Complete retail management system — billing, stock, purchases, customers, PDF invoices, live gold-rate calculator, hallmark HUID splitting engine. 20+ automated unit tests. 100% offline-capable.

Stack: React · Vite · Supabase · Vitest · OpenCode · Claude (Review Agent)

Agentic Architecture: Continuous review sub-agent loop — code modifications automatically flagged, reviewed by independent Claude agent, and patched before deployment.
- Sewadar Attendance System

LIVE ON NETLIFY

Offline-first employee attendance with camera QR/barcode scanning (1-second check-in), 3 role tiers, queued sync, Excel export reports.

Stack: React · Vite · Barcode Vision · IndexedDB · OpenCode · DeepSeek (Code Gen)

Agentic Architecture: Rapid prototyping with AI-assisted code generation — concept to deployed Netlify app in under 48 hours.
- DataFlow Pro — BI Platform

SHIPPED AT TROSSACHS

Real-time analytics across revenue, compliance risk and operational KPIs. Saved 15–20 hrs/month of manual data processing.

Stack: Power BI · SQL · Python · OpenCode · Claude (SQL Refactor)

Agentic Architecture: Multi-model routing — Claude for SQL refactoring, OpenCode for pipeline orchestration.

EDUCATION

- Bachelor of Computer Applications — AI

9.0 CGPA

Lingaya's Vidyapeeth, Faridabad · 2023 – 2026
- Senior Secondary — Commerce

93% Class 12

Grand Columbus International School, Faridabad · 2021 – 2023

CERTIFICATIONS (15+)

- 2026 Business Analysis Foundations — LinkedIn Learning / IIBA

2025 Power BI for Data Analysis — Vodafone Idea Foundation

2025 SOAR — AI to be Aware (NSQF Level 2) — NASSCOM

2025 Advance Your MS SQL Server Skills — LinkedIn Learning

2024 Introduction to Business Intelligence — Infosys Springboard

2025 SQL Server 2022 Administration — LinkedIn Learning

2025 Build Reports & Dashboards in Power BI — Vodafone Idea

2025 MongoDB Basics — MongoDB / Credly

2024 NumPy, SciPy, Matplotlib & Pandas A–Z — Udemy

2024 Operating System Fundamentals — NPTEL / IIT Kharagpur
